

## **TECHNICAL ENGLISH**

Student Load: 4 SWS

Instructor: Kevin Parr

Textbooks: Materials and resources will be provided during the course

Goals: To improve communication, fluency and vocabulary relating to technical situations in the working environment.

Content: The course will focus on everyday technical English used in industries, particularly from this region, and will concern describing technical functions, materials, parts, problems, etc. as well as any specific themes requested by the class.

Prerequisites: B1/2

Method of teaching: principally discussions and presentations.
